

CSS

Selectors

| | |
|-------------------------|--|
| <code>.class</code> | Selects all elements with <code>.class</code> |
| <code>#id</code> | Selects all elements with <code>#id</code> |
| <code>*</code> | Selects all elements |
| <code>div</code> | Selects all <code><div></code> elements |
| <code>div, p</code> | Selects all <code><div></code> and <code><p></code> elements |
| <code>div > p</code> | Selects all <code><p></code> elements with an immediate parent of <code><div></code> |
| <code>div + p</code> | Selects all <code><p></code> elements placed immediately after <code><div></code> elements |
| <code>div~p</code> | Selects all <code><p></code> elements preceded by <code><div></code> elements, provided they share the same parent |

Attributes

| | |
|----------------------------------|---|
| <code>[attribute]</code> | Selects all elements with the specified attribute |
| <code>[attribute=value]</code> | Selects all elements where the specified attribute is equal to 'value' |
| <code>[attribute~=value]</code> | Selects all elements with an attribute containing the word 'value' |
| <code>[attribute =value]</code> | Selects all elements with an attribute list starting with 'value' |
| <code>[attribute^=value]</code> | Selects all elements with an attribute beginning with 'value' |
| <code>[attribute\$=value]</code> | Selects all elements with an attribute ending with 'value' |
| <code>[attribute*=value]</code> | Selects all elements with an attribute containing the substring 'value' |

Pseudo-classes

| | |
|--------------------------------------|--|
| <code>a:link</code> | Selects all unvisited links |
| <code>a:visited</code> | Selects all visited links |
| <code>a:hover</code> | Selects links on mouse hover |
| <code>a:active</code> | Selects the active link element |
| <code>p::after</code> | Insert content after <p> element |
| <code>p::before</code> | Insert content before <p> element |
| <code>input:checked</code> | Selects every checked <input> element |
| <code>input:disabled</code> | Selects every disabled <input> element |
| <code>p:empty</code> | Selects every <p> element with no children |
| <code>input:enabled</code> | Selects every enabled <input> element |
| <code>p:first-child</code> | Selects every <p> element that is the first child of its parent |
| <code>p::first-letter</code> | Selects the first letter of every <p> element |
| <code>p::first-line</code> | Selects the first line of every <p> element |
| <code>p:first-of-type</code> | Selects every <p> element that is the first <p> element of its parent |
| <code>input:focus</code> | Selects the <input> element which has focus |
| <code>input:in-range</code> | Selects <input> elements with a value within a specified range |
| <code>input:invalid</code> | Selects all <input> elements with an invalid value |
| <code>p:lang(<i>language</i>)</code> | Selects all <p> elements with a lang attribute equal to 'language' |
| <code>p:last-child</code> | Selects every <p> element which is the last child of its parent |
| <code>p:last-of-type</code> | Selects every <p> element which is the last <p> element of its parent |
| <code>:not(p)</code> | Selects every element that is not a <p> |
| <code>p:nth-child(2)</code> | Selects every <p> element that is the second child of its parent |
| <code>p:nth-last-child(2)</code> | Selects every <p> element that is the second child of its parent, counting from the last child |

| | |
|------------------------------------|--|
| <code>p:nth-last-of-type(2)</code> | Selects every <code><p></code> element that is the second <code><p></code> element of its parent, counting from the last child |
| <code>p:nth-of-type(2)</code> | Selects every <code><p></code> element that is the second <code><p></code> element of its parent |
| <code>p:only-of-type</code> | Selects every <code><p></code> element that is the only <code><p></code> element of its parent |
| <code>p:only-child</code> | Selects every <code><p></code> element that is the only child of its parent |
| <code>input:optional</code> | Selects <code><input></code> elements with no 'required' attribute |
| <code>input:out-of-range</code> | Selects <code><input></code> elements with a value outside a specified range |
| <code>input:read-only</code> | Selects <code><input></code> elements with the 'readonly' attribute specified |
| <code>input:read-write</code> | Selects <code><input></code> elements with the 'readonly' attribute not specified |
| <code>input:required</code> | Selects <code><input></code> elements with the 'required' attribute specified |
| <code>:root</code> | Selects the documents root element |
| <code>::selection</code> | Selects the portion of an element that is selected by a user |
| <code>#id:target</code> | Selects the current active #id element |
| <code>input:valid</code> | Selects all <code><input></code> elements with a valid value |
